Tools & Technologies: React Query, SQL, Git, REST APIs, Cloud Platforms (AWS basics), CI/CD, Data Visualisation

■■■ WORK EXPERIENCE

stack8s

Software Engineer, Fullstack   January 2026 - Present

- Standardised frontend components and UI to address design inconsistency, implementing reusable patterns that improved visual appeal and accessibility, while strengthening scalable frontend development practices.
- Built a multi-agent RAG-based system to simplify infrastructure decisions by translating user prompts into structured compute and tooling recommendations, improving deployment speed and clarity.

Turing Tower

Senior Frontend Engineer   April 2024 - January 2026

- Directed the development of an enterprise web application enabling network engineers to monitor databases efficiently, attracting paying corporate clients within three months and driving a 25% revenue increase.
- Led the development of a flagship healthcare platform, improving data accessibility and boosting operational efficiency by 30%.
- Collaborated with cross-functional teams on secure, cloud-hosted deployments—enhancing exposure to cloud architecture and security-conscious development practices

Freelance

Software Engineer   September 2023 - Present

- Designed and developed landing pages and web apps for 5+ small businesses and startups in Nigeria, improving visibility and driving business growth by 30%.
- Authored software engineering articles for an AI-powered SEO platform, boosting user retention and visibility through optimised technical content.
- Served as Frontend Engineering Instructor for 20+ students, teaching HTML, CSS, and JavaScript fundamentals and fostering collaborative problem-solving.

Septagus Consulting/Sterling Bank Plc

Information Security, Service Desk Officer   June 2023 - September 2023

- Conducted research on emerging cybersecurity threats and vulnerabilities, contributing to proactive mitigation strategies and improved security awareness.
- Assisted in incident response activities, including logging, initial analysis, and monitoring of antivirus and firewall configurations.
- Supported IT operations and security compliance by applying cybersecurity and information security principles such as vulnerability research, incident response support, and firewall/antivirus configuration awareness, while enhancing data privacy and regulatory alignment.

Zero & One Technologies Ltd

Frontend Developer   May 2022 - June 2023

- Developed a large-scale web app for election result visualisation in Nigeria, supporting over 9,000 users and ensuring real-time reliability.
- Created reusable UI components from Figma designs, accelerating project delivery by 30%.
- Mentored interns in frontend development practices, improving team productivity and reducing review cycles by 40%.

■■■ EDUCATION

University of East Anglia, Norwich, United Kingdom

MSc. Advanced Computing Science   September 2025 - Present
